Detailed Questions

Questions 1–50

001	For each customer state group, show the state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
002	For each customer state group, show the state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
003	For each customer state group, show the state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
004	For each customer state group, show the state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
005	For each customer state group, show the state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
006	For each customer city group, show the city, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
007	For each customer city group, show the city, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
008	For each customer city group, show the city, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
009	For each customer city group, show the city, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
010	For each customer city group, show the city, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
011	For each product category group, show the product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.

012	For each product category group, show the product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
013	For each product category group, show the product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
014	For each product category group, show the product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
015	For each product category group, show the product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
016	For each order status group, show the order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
017	For each order status group, show the order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
018	For each order status group, show the order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
019	For each order status group, show the order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
020	For each order status group, show the order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
021	For each order month group, show the order month, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
022	For each order month group, show the order month, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
023	For each order month group, show the order month, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
024	For each order month group, show the order month, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.

025	For each order month group, show the order month, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
026	For each customer profile group, show the customer name, city, and state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
027	For each customer profile group, show the customer name, city, and state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
028	For each customer profile group, show the customer name, city, and state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
029	For each customer profile group, show the customer name, city, and state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
030	For each customer profile group, show the customer name, city, and state code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
031	For each product group, show the product name, category, and unit price, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
032	For each product group, show the product name, category, and unit price, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
033	For each product group, show the product name, category, and unit price, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
034	For each product group, show the product name, category, and unit price, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
035	For each product group, show the product name, category, and unit price, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
036	For each state and category group, show the state code and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.

037	For each state and category group, show the state code and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
038	For each state and category group, show the state code and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
039	For each state and category group, show the state code and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
040	For each state and category group, show the state code and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
041	For each customer and category group, show the customer name and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
042	For each customer and category group, show the customer name and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
043	For each customer and category group, show the customer name and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.
044	For each customer and category group, show the customer name and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
045	For each customer and category group, show the customer name and product category, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.
046	For each category and status group, show the product category and order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total sales amount, highest first.
047	For each category and status group, show the product category and order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by order count, largest first.
048	For each category and status group, show the product category and order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by average order amount, highest first.

049	For each category and status group, show the product category and order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by total units, largest first.
050	For each category and status group, show the product category and order status code, the number of orders and customers, total units sold, total sales, average and largest order amount, and delivered-order count; sort by delivered-order count, largest first.

Quick Questions

Questions 51–100

051	How many customers are there?
052	What are all customer names?
053	Show customer names and cities.
054	Who lives in Mumbai?
055	How many Maharashtra customers are there?
056	Which customers live in Maharashtra?
057	How many Karnataka customers are there?
058	Which cities have customers?
059	How many customers are in each state?
060	Who is the newest customer?
061	How many products are there?
062	What are all product names?
063	What is the most expensive product?
064	What is the cheapest product?
065	What is the average product price?
066	How many products are in each category?
067	Which products cost over 10000?
068	Which products cost under 5000?

069	What is the total price of all products?
070	How many orders are there?
071	How many delivered orders are there?
072	How many pending orders are there?
073	How many processing orders are there?
074	How many cancelled orders are there?
075	What is the total order amount?
076	What is the average order amount?
077	What is the largest order?
078	What is the smallest order?
079	Show all orders by date.
080	Show the five biggest orders.
081	How many orders are in each status?
082	How many units were ordered?
083	Which customer spent the most?
084	How much did each customer spend?
085	How many orders did each customer place?
086	Which customer placed the most orders?
087	How many employees are there?
088	What are all employee names?
089	Who has the highest salary?
090	Who has the lowest salary?
091	What is the average employee salary?

092	What is the total salary expense?
093	How many employees are in each department?
094	Who earns more than 80000?
095	Who joined first?
096	Who joined most recently?
097	Which products have been ordered?
098	What is the most ordered product by quantity?
099	Which product generated the most sales?
100	What is the total sales by product?
